A STATISTICAL HANDBOOK FOR THE WESTERN LETTUCE INDUSTRY¹

M. V. Waananen and J. S. Hillman²

This publication contains historical and current statistical information relative to the Arizona-California lettuce industry, with supplemental information relative to the lettuce industry in the United States. Most of these data have been compiled from annual summaries of the lettuce seasons in the western producing districts and annual summaries of commercial vegetables, both now published by the Agricultural Marketing Service, U. S. Department of Agriculture.

No attempt has been made to analyze the information included in the following tables. They are here presented for reference use by the industry and will be used as a basis for subsequent analysis.

¹This report represents the first phase of work being done relative to Western Regional Marketing Project WM-14, "Marketing Western Head Lettuce." This project is supported by Section 9, Title I, of the Amendment to the Bankhead-Jones Act and the Agricultural Marketing Act of 1946, with the Arizona and California Agricultural Experiment Stations and the Agricultural Marketing Service, U. S. Department of Agriculture cooperating.

²Department of Agricultural Economics, Arizona Agricultural Experiment Station.
